Gary Gardiner will be doing seminars on towing, weights & measures

Hayman Reese has been involved in the towbar manufacturing market since 1951 and as Australia's leading towbar manufacturer is always happy to be involved with relevant events like the QLD state caravan rally.

Gary Gardiner, Hayman Reese Towing Technical expert, has attended all of the QLD State rally's since Toogoolawah in 2010 and will be attending the rally in Bundaberg. He will be there to discuss a range of towing topics for the attendee's during dedicated seminar presentations but will also be staying onsite for a few days and will be available for some general discussions outside the seminar presentations.

At this stage Gary is also considering holding a 2 day Weight Distribution Hitch check and adjustment for any attendees of the Rally, if there is enough interest. These would need to be booked in and would incur a small charge as well as cost of any parts required. Gary conducted these at the Stanthorpe rally and the response from those that had the opportunity to have their WDH checked and correctly set up was fantastic. There will be more detail about these days closer to the Rally.
